

2013 LINCOLN MKZ

The all-new 2013 Lincoln MKZ represents the future of Lincoln in both style and substance: stunning design wrapped around intuitive, purposeful technology.

The first vehicle from the dedicated Lincoln Design Studio, the MKZ signifies the introduction of the reinvented Lincoln brand and the new Lincoln Motor Company, which will focus on attracting a new body of premium automotive customers.

The 2013 Lincoln MKZ is produced at Hermosillo (Mexico) Stamping and Assembly Plant and is priced at \$35,925 (plus \$875 destination charges).

NEW AND NOTABLE

> **Lincoln Drive Control** is an automatic system that delivers an ideal balance of a smooth ride with confident handling as it intuitively responds to driver commands and the road, making the 2013 model the most refined and engaging MKZ ever.

Always on and standard, Lincoln Drive Control orchestrates the performance of the Continuously Controlled Damping (CCD) adjustable suspension, electric power-assisted steering (EPAS) and Active Noise Control (ANC) systems.

The result is an excellent combination of refined ride and engaging driving dynamics. CCD offers three modes (Sport/Normal/Comfort) that are accessible using MyLincoln Touch. Selecting "Sport" on the push button shift gear selector enables a decidedly more sporty driving experience.

- > Quicker accelerator response
- > More aggressive sound

- > Upshifts at higher rpms
- > More aggressive downshifts
- > Gears held longer in corners
- > Sixth-gear lockout
- > Modified Advance Trac® ESC

> **CCD** contributes to Lincoln Drive Control's transparent action by monitoring the car's suspension settings up to 500 times per second. The real-time system adjusts the suspension up to 50 times per second to deliver more controlled handling with a smoother ride. CCD augments a highly developed chassis that includes a refined strut front suspension and an all new integral link rear suspension.

> **ANC** constantly monitors and manages engine sounds within the vehicle. It reduces certain engine sounds while subtly enhancing others, refining engine sound for a more enjoyable interior environment.

The new MKZ is the only sedan in its class to include Continuously Controlled Damping and Active Noise Control as standard equipment.

> **The retractable panoramic roof** is a new signature feature for Lincoln. The 15.2-square-foot glass panel offers one of the largest openings available on any current sedan. The design maintains the structural strength of a steel-roof vehicle. Click [here](#) to learn more.

> **Push button shift** is a unique execution that replaces the traditional mechanical transmission shift lever with a contemporary five-button interface and dramatically opens up the center console.

> The new MKZ is the only sedan in its class to offer **inflatable outboard rear seat belts**, which spread impact forces across more than five times the area of conventional belts. This reduces pressure on the chest while helping to control head and neck motion and reduce the risk of injuries.

> The 2013 Lincoln MKZ embodies a **design language** that is subtly distinctive.

A sweeping roofline defines the new luxury sedan's profile. The steeply raked windshield and lengthened backlight make for a sleeker and more flowing appearance that is 10 percent more aerodynamic than the model it replaces.

BASIC TECHNICAL SPECIFICATIONS

WHEELBASE	OVERALL LENGTH	OVERALL WIDTH	OVERALL HEIGHT
112.2 in.	194.1 in.	83.3 in. (including mirrors)	58.2 in.
ENGINES	HORSEPOWER	TORQUE	FUEL ECONOMY
